TRANSFORMERS - PART 2: GENERAL PURPOSE
TRANSFORMERS

Additional Information:

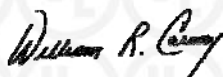

See the UL Online Certifications Directory at
www.ul.com/database for additional information

Only those products bearing the UL Recognized Component Marks for the U.S. and Canada should be considered as being covered by UL's Recognition and Follow-Up Service and meeting the appropriate U.S. and Canadian requirements.

The UL Recognized Component Mark for the U.S. generally consists of the manufacturer's identification and catalog number, model number or other product designation as specified under "Marking" for the particular Recognition as published in the appropriate UL Directory. As a supplementary means of identifying products that have been produced under UL's Component Recognition Program, UL's Recognized Component Mark: , may be used in conjunction with the required Recognized Marks. The Recognized Component Mark is required when specified in the UL Directory preceding the recognitions or under "Markings" for the individual recognitions. The UL Recognized Component Mark for Canada consists of the UL Recognized Mark for Canada:  and the manufacturer's identification and catalog number, model number or other product designation as specified under "Marking" for the particular Recognition as published in the appropriate UL Directory.

Recognized components are incomplete in certain constructional features or restricted in performance capabilities and are intended for use as components of complete equipment submitted for investigation rather than for direct separate installation in the field. The final acceptance of the component is dependent upon its installation and use in complete equipment submitted to UL LLC.

Look for the UL Recognized Component Mark on the product.

CERTIFICATE OF COMPLIANCE

Certificate Number 20131219-E193465
Report Reference E193465-20131218
Issue Date 2013-DECEMBER-19

This is to certify that representative samples of the product as specified on this certificate were tested according to the current UL requirements.

USR/CNR – Construction only, Component transformer, Single Phase, Series:

ELUS followed by xxxx followed by A, F or H, followed by –yyww followed by zzzzzz

ELUL followed by xxxx followed by A, F or H, followed by –yyww followed by zzzzzz

BLUS followed by xxxx followed by A, F or H, followed by –yyww followed by zzzzzz

BLUL followed by xxxx followed by A, F or H, followed by –yyww followed by zzzzzz

ELAS followed by xxxx followed by A, F or H, followed by –yyww followed by zzzzzz

ELAL followed by xxxx followed by A, F or H, followed by –yyww followed by zzzzzz

BLAS followed by xxxx followed by A, F or H, followed by –yyww followed by zzzzzz

BLAL followed by xxxx followed by A, F or H, followed by –yyww followed by zzzzzz

Nomenclature:

“xxxx” indicates power in kVA;

“A” indicates Class 105(A);

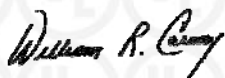

“F” indicates Class 155(F);

“H” indicates Class 180(H);

“yy” indicates last digit of the year e.g. “13” stands for 2013;

“ww” indicates the calendar week;

“zzzzzz” can be any alpha-numeric character indicating none safety relevant (e.g. customer project number)
